

RING SIZE GUIDE

1st WAY- WITH THE HELP OF YOUR RING

- Find your own ring that suits you, has the best fit on the finger you want to wear your new ring and looks like the ring you want to buy.
- Measure the inner distance of the ring with a ruler (inner diameter)
- In the Size chart that follows, find the "Diameter" column and look for the inner diameter that corresponds to your measurement. From there you will find the size of the ring that fits your diameter. If you can't find the exact diameter, select the larger one immediately.

2nd WAY - MEASURE YOUR FINGER

- 1) Cut a thin strip of paper or use a measuring tape.
- 2) Wrap it around the finger on which you want to wear the ring you are interested in, without squeezing it and without it being completely loose, until one end meets the other.
- 3) Once the 2 ends are applied, mark the point of contact with a marker.
- 4) Open the ribbon in its straight line and with a ruler measure the distance of the 2 ends in millimeters (mm) or respectively see the length indicated by the measuring tape at the point you marked.
- 5) In the Size chart that follows, find the "Perimeter" column and look for the length that corresponds to your measurement. From there you will find the size of the ring that suits your length. If you can't find the exact length, select the larger one immediately.

PERIMETER	DIAMETER	NUMBER
mm	mm	EUROPE
44.2	14.1	44
44.8	14.3	45
45.5	14.5	45
